About The Lessons – students learn physics, mathematics, mechanical & software engineering by watching engaging demonstrations and by building Lego prototypes of real-world machines. Problem solving, critical thinking and collaboration are key elements of the program.

About How We Teach - some classes operate in a multi-age environment. In all cases, we optimize our delivery according to ability and interest. Lessons and activities are different for each term.

Peace of Mind - all educators are working with children compliant according to state laws. All after-school clubs operate in agreement with the host school.

Young Engineers club is an Australia-wide initiative to help kids Learn & LOVE STEM
